

**What is claimed is:**

1           1.    A universal serial bus integrated device,  
2 comprising:

3           a housing; and

4           an integrated circuit board, disposed in the  
5           housing, comprising a plurality of universal  
6           serial bus slots thereon.

1           2.    The integrated device as claimed in claim 1,  
2 further comprising a first peripheral device, detachably  
3 connected to one of the universal serial bus slots.

1           3.    The integrated device as claimed in claim 2,  
2 wherein the first peripheral device comprises a converter  
3 and a first universal serial bus connector, inserted into  
4 one of the universal serial bus slots, such that signals  
5 of the first peripheral device are converted to universal  
6 serial bus signals by the converter.

1           4.    The integrated device as claimed in claim 2,  
2 wherein the first peripheral device is shaped into a  
3 plate.

1           5.    The integrated device as claimed in claim 4,  
2 wherein the first peripheral device comprises a hard disk  
3 drive.

1           6.    The integrated device as claimed in claim 4,  
2 wherein the first peripheral device comprises an optical  
3 disk drive.

1           7.    The integrated device as claimed in claim 4,  
2 wherein the first peripheral device comprises a modem.

1           8.    The integrated device as claimed in claim 4,  
2 wherein the first peripheral device comprises a floppy  
3 disk drive.

4           9.    The integrated device as claimed in claim 1,  
5 further comprising a central processing device,  
6 detachably connected to one of the universal serial bus  
7 slots.

1           10.   The integrated device as claimed in claim 9,  
2 wherein the central processing device comprises a  
3 converter and a first universal serial bus connector,  
4 inserted into one of the universal serial bus slots, such  
5 that signals of the central processing device are  
6 converted to universal serial bus signals by the  
7 converter.

1           11.   The integrated device as claimed in claim 1,  
2 further comprising a universal serial bus port disposed  
3 in the housing and a second peripheral device, connected  
4 to the integrated circuit board through the universal  
5 serial bus port.

1           12.   The integrated device as claimed in claim 11,  
2 wherein the second peripheral device comprises a hub, a  
3 keyboard, a mouse, a printer, a scanner, and a digital  
4 camera.

1           13. The integrated device as claimed in claim 1,  
2 wherein the integrated circuit board further comprises a  
3 second universal serial bus connector for connection with  
4 other computers.

1           14. The integrated device as claimed in claim 1,  
2 further comprising an opening, corresponding to the  
3 integrated circuit board in the housing.
